

Don't Just Rebuild it ... Improve it ! One Complete Kit Does it All

All Kent Camshafts are high lift - high torque - wide power band cams with phenomenal mid-range and top end power. They are precision reground to the highest standard using the most current technological equipment.

They will operate at maximum efficiency and satisfaction, only when installed properly in the correct application.

Assembly Tip:

You must use cam lube on camshaft and cam lifters before assembly to prevent scuffing during initial start-up.

Road Speed Grind: To put you way out in front and still have a smooth idle at a light.

Contents of kits were specially selected so that all components are compatible and will fit without additional machining necessary.

Kent Camshaft Kit Includes:

- Kent Performance Camshaft
- Lifters
- Cam Lubricant
- Valve Springs

Kent Cam Sprockets for Razor Sharp Timing

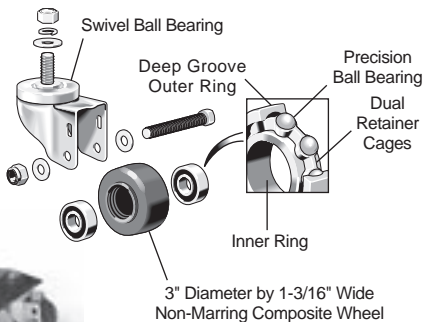

Made in England

The Adjustable Cam Sprocket allows precise indexing of the camshaft with just the touch of a dial while it's still on the car. Solid Steel Cam Sprockets are more durable and lighter than the original cast iron sprockets that came on your car.

Aluminum Flywheel

Your OE Flywheel is very heavy and robs the engine of vital power. This Aluminum Flywheel is lightweight yet has a strong design. This allows the engine to use the horsepower it creates to turn the wheels and not waste it turning a heavy steel flywheel. It is made from 6061 T6 Aluminum with a heat treated 1050 steel friction surface secured with stainless steel rivets. Special Ring Gear is pressed on and secured with grade 10 fasteners. New coarse thread bolts, lock washers and dowels are included to mount your clutch cover.
