## Carburetors ... Reliable Power 32mm/36mm DGV and 40/45mm DCOE Conversion Kits

### WEBER DGV Carburetor for Reliable Street Power

Give your Sprite or Midget daily reliable starting and driving, trouble-free maintenance along with the consistent performance of a WEBER. The WEBER DGV Kit is a genuine high performance carburetor. It features a diaphragm-type accelerator pump with 32mm primary and 36mm secondary barrel diameters. The DGV also features a

high speed enrichment circuit and a power valve circuit to improve performance at low vacuum running conditions.

This two barrel progressive downdraft carburetor, designed for day-in-day-out street driving, is ideal because it is easy to install and maintain. WEBER DGV Carburetor Conversion Kits contain: DGV Carburetor and Intake Manifold, LONGFLO Chrome Air Filter, all necessary hardware and installation instructions.

Three different kits are offered for electric, water or manual choke. Please check yours before ordering.

No engine modifications are required for installation.

Increases in fuel efficiency and horsepower are based on a car operating at factory specifications. Increases may vary according to the condition of your car and driving habits.

### Performance Exhaust Headers - See Page 100

PART	DESCRIPTION AND APPLICATION		LIST	SELL
<b>WEBER DGV Carburetors</b>				
3-453	DGV KIT	ELEC CHOKE "A" SPRITE MIDGET	58-74	699.94 559.95

Note: "A" Bugeye Sprite requires later style exhaust manifold or exhaust header.

*Not legal for sale or use on pollution controlled vehicles.*

### WEBER DCOE Carburetor for Reliable Pure Power

The DCOE WEBER Carburetor Conversion Kit is a Pure Power performance product with a Grand Prix Racing Heritage. That provides the opportunity to have race quality carburetion for your Sprite or Midget. Each kit is pre-assembled.

**WEBER DCOE Carburetors are not compatible with vacuum advance distributors; therefore, the distributor should be recurved for all centrifugal advance. We recommend that you use the Mallory Dual Point Distributor, found on page 106, when installing your WEBER DCOE Carburetors.**

WEBER DCOE Carburetor Conversion Kits contain: DCOE Carburetor, intake manifold, velocity stacks, **LONGFLO** Air Cleaners and installation instructions. No engine modifications are required for installation. Each kit comes pre-assembled and ready to bolt on.

- Features ball bearing throttle shafts.
- Features piston-type accelerator pump circuits.
- Features infinite tuneability with interchangeable calibrated parts.
- Can be tailor fit to full race use or street use - you choose.

High-performance conversion on an engine of less than excellent condition may aggravate existing weak-link defects. Be sure ignition, timing, compression and bearings are all up to factory standards before replacement.

## Makes the World's Best Air Filters for Your Car

Regarding Emission Control, VICTORIA BRITISH LTD. does not have any other information for the change or alteration of emission systems. We recommend you maintain your emission systems ... except in the event of off-road racing.

- **Increased Performance Through Unrestricted Airflow** - Unique design increases airflow, therefore improving power and increasing gas mileage. The filter is protected by a form-fit bonded wire mesh grid, which aids in straightening the airflow to reduce turbulence and direct the air into the carburetor.
- **Unaffected By Moisture, Emission Control or Smog Devices** - Unlike paper and foam filters, the K&N oiled fabric is unaffected by moisture, high humidity or excessive oil blow-by from emission control devices.
- **Economical** - K&N Filters actually cost less because they are designed to be used for years and will withstand repeated cleaning. K&N backs them with a replacement warranty for one million miles or ten years of non-competition use.

K&N has developed the only air filtration system of its kind. A high-flow washable filter that continues to be proven the finest in the world. Racers around the world depend on K&N Air Filters to protect their expensive engines and so should you.

K&N Hi-Performance Air Filters are made with a pleated multi-layered cotton fabric that suspends dirt on the outside of the filter. Air freely passes through the filter, trapping dirt in the slightly oiled fabric and holding it there. Then, the dirt absorbs the oil within the filter, which becomes an additional filtering medium. Filters will not clog or restrict airflow for up to 50,000 miles of normal use.

### This is No Ordinary Filter!

## Custom Chrome Assembly ... Racing Style

A K&N Performance Air Filter in a custom show quality chrome assembly. Increase horsepower with the performance of a K&N filter and dress up your engine all in one package. These filters replace your stock filters and bolt directly to your carb.

Not legal for sale or use on pollution controlled vehicles.

## Performance Air Filters ... Increased Horsepower

Improve performance just by changing to a K&N Performance Air Filter. K&N filters are designed to achieve high, virtually unrestricted airflow while providing excellent filtration for long engine life. More air means more horsepower and faster throttle response.

Unlike other filters you use and throw away, K&N filters clean easily and are reusable for the life of your engine. Filters carry a one million mile limited warranty. These filters are replacements for your stock air filter.

## LONGFLO Air Cleaner

Designed for power with unrestricted airflow to give your carburetor the air to burn. The element can be washed in mild detergent and water and reused.
